

Junior Full Stack Web Developer Job Description

Overview

We are seeking a motivated Junior Full Stack Web Developer to join our dynamic team. This entry-level role is perfect for someone passionate about building user-friendly, scalable web applications and eager to grow their skills in both front-end and back-end development.

Responsibilities

- Develop and maintain web applications using modern front-end and back-end technologies.
- Collaborate with designers, product managers, and senior developers to translate requirements into functional code.
- Write clean, efficient, and well-documented code following best practices.
- Assist in designing and implementing APIs to support front-end functionality.
- Participate in code reviews to ensure quality and adherence to standards.
- Troubleshoot and debug issues across the application stack.
- Stay updated on emerging web development trends and technologies.

Qualifications

- Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent experience).
- Basic understanding of front-end technologies: HTML, CSS, JavaScript, and frameworks like React, Vue.js, or Angular.
- Familiarity with back-end technologies: Node.js, Python (Django/Flask), Ruby on Rails, or similar.
- Knowledge of databases (e.g., MySQL, PostgreSQL, MongoDB) and basic SQL.
- Experience with version control systems, preferably Git.
- Strong problem-solving skills and attention to detail.
- Ability to work collaboratively in a team environment.
- Eagerness to learn and adapt to new tools and technologies.

Preferred Skills

- Experience with RESTful APIs or GraphQL.
- Basic understanding of cloud platforms (e.g., AWS, Azure, Google Cloud).
- Familiarity with Agile/Scrum methodologies.
- Exposure to testing frameworks (e.g., Jest, Mocha, PyTest).
- Basic knowledge of UI/UX principles.

Benefits

- Competitive salary and health benefits.
- Opportunities for professional growth and mentorship.
- Flexible work hours and remote work options.
- Collaborative and innovative team environment.

How to Apply

Please submit your resume, a cover letter, and links to any relevant projects or GitHub repositories to careers@company.com. We look forward to reviewing your application!
